

AMENDMENT TO THE SPECIFICATION

CROSS-REFERENCE TO RELATED APPLICATIONS

This application is a division of United States Patent Application No. 09/517,803,
filed March 2, 2000, now U.S. Patent No. _____.

35.(New) The device of claim 26, wherein said composition is capable of passing at least one test selected from the group consisting of Fire Test No. 1, Fire Test No. 2 and Fire Test No. 3, when installed in the fire rated construction of the test.

36.(New) The device of claim 26, wherein said elastomer is selected from the group consisting of polychloroprene, styrene butadiene rubber and mixtures thereof.

37.(New) The device of claim 26, wherein said composition is a latex composition.

38.(New) The aerosol container of claim 27, wherein said composition is capable of passing at least one test selected from the group consisting of Fire Test No. 1, Fire Test No. 2 and Fire Test No. 3, when installed in the fire rated construction of the test.

39.(New) The aerosol container of claim 27, wherein said elastomer is selected from the group consisting of polychloroprene, styrene butadiene rubber and mixtures thereof.

40.(New) The aerosol container of claim 27, wherein said composition is a latex composition.

41.(New) The device of claim 29, wherein said composition, when dry, exhibits at least about 600 % elongation.

42.(New) The device of claim 29, wherein said composition, when dry, exhibits a modulus of from about 200 psi to about 300 psi.

43.(New) The device of claim 29, wherein said composition, when dry, exhibits a tensile strength of from about 300 psi to about 1500 psi.

44.(New) The device of claim 29, wherein said composition, when dry, exhibits a toughness of at least about 30 in-lb.

45.(New) The device of claim 29, wherein said composition is substantially free of volatile organic compounds.

46.(New) The device of claim 29, wherein said elastomer is selected from the group consisting of polychloroprene, styrene butadiene rubber and mixtures thereof.

47.(New) The device of claim 29, wherein said composition is capable of passing at least one test selected from the group consisting of Fire Test No. 1, Fire Test No. 2 and Fire Test No. 3, when installed in the fire rated construction of the test.

48.(New) The device of claim 29, wherein said composition is a latex composition.

49.(New) The aerosol container of claim 30, wherein said composition is capable of passing at least one test selected from the group consisting of Fire Test No. 1, Fire Test No. 2 and Fire Test No. 3, when installed in the fire rated construction of the test.

50.(New) The aerosol container of claim 30, wherein said elastomer is selected from the group consisting of polychloroprene, styrene butadiene rubber and mixtures thereof.

51.(New) The aerosol container of claim 30, wherein said composition is a latex composition.

52.(New) The device of claim 31, wherein said composition, when dry, exhibits a modulus of from about 200 psi to about 300 psi.

53.(New) The device of claim 31, wherein said elastomer is selected from the group consisting of polychloroprene, styrene butadiene rubber and mixtures thereof.

54.(New) The device of claim 31, wherein said composition is capable of passing at least one test selected from the group consisting of Fire Test No. 1, Fire Test No. 2 and Fire Test No. 3, when installed in the fire rated construction of the test.

55.(New) The device of claim 31, wherein said composition is a latex composition.

56.(New) The aerosol container of claim 32, wherein said composition is capable of passing at least one test selected from the group consisting of Fire Test No. 1, Fire Test No. 2 and Fire Test No. 3, when installed in the fire rated construction of the test.

57.(New) The aerosol container of claim 32, wherein said elastomer is selected from the group consisting of polychloroprene, styrene butadiene rubber and mixtures thereof.

58.(New) The aerosol container of claim 32, wherein said composition is a latex composition.

59.(New) The device of claim 33, wherein said composition, when dry, exhibits at least about 600 % elongation.

60.(New) The device of claim 33, wherein said composition, when dry, exhibits a modulus of from about 200 psi to about 600 psi.

61.(New) The device of claim 33, wherein said composition is capable of passing at least one test selected from the group consisting of Fire Test No. 1, Fire Test No. 2 and Fire Test No. 3, when installed in the fire rated construction of the test.
